Environmentally Sealed CAT-5, IEEE 1394b-2002 Interconnect System

May 29, 2006

Sponsored by:
1394 Trade Association

Accepted for publication by
This draft specification has been accepted by the 1394 Trade Association Board of Directors

Abstract
This specification defines an environmentally sealed CAT-5e connector systems, which meets IEEE-1394b-2002 specifications, for use in demanding factory automation, medical, test equipment and industrial applications.

Keywords
IEEE 1394, Serial Bus, connector, CAT-5, industrial, environmentally sealed
1394 Trade Association Specifications are developed within Working Groups of the 1394 Trade Association, a non-profit industry association devoted to the promotion of and growth of the market for IEEE 1394-compliant products. Participants in Working Groups serve voluntarily and without compensation from the Trade Association. Most participants represent member organizations of the 1394 Trade Association. The specifications developed within the working groups represent a consensus of the expertise represented by the participants.

Use of a 1394 Trade Association Specification is wholly voluntary. The existence of a 1394 Trade Association Specification is not meant to imply that there are not other ways to produce, test, measure, purchase, market or provide other goods and services related to the scope of the 1394 Trade Association Specification. Furthermore, the viewpoint expressed at the time a specification is accepted and issued is subject to change brought about through developments in the state of the art and comments received from users of the specification. Users are cautioned to check to determine that they have the latest revision of any 1394 Trade Association Specification.

Comments for revision of 1394 Trade Association Specifications are welcome from any interested party, regardless of membership affiliation with the 1394 Trade Association. Suggestions for changes in documents should be in the form of a proposed change of text, together with appropriate supporting comments.

Interpretations: Occasionally, questions may arise about the meaning of specifications in relationship to specific applications. When the need for interpretations is brought to the attention of the 1394 Trade Association, the Association will initiate action to prepare appropriate responses.

Comments on specifications and requests for interpretations should be addressed to:

Editor, 1394 Trade Association

1394 Trade Association Specifications are adopted by the 1394 Trade Association without regard to patents which may exist on articles, materials or processes or to other proprietary intellectual property which may exist within a specification. Adoption of a specification by the 1394 Trade Association does not assume any liability to any patent owner or any obligation whatsoever to those parties who rely on the specification documents. Readers of this document are advised to make an independent determination regarding the existence of intellectual property rights, which may be infringed by conformance to this specification.

Foreword:

Today, the IEEE 1394b-2002 specification defines a CAT-5 interface for use in typical commercial applications. Many applications, however, require a ruggedized version of this interface.

This specification will act as an additional approved 1394b interface for applications requiring additional ruggedness and the approved IEEE 1394b-2002 CAT 5e interface.

There is one annex, Annex A, in this specification, which is informative and is not considered part of this specification.

This specification was accepted by the Board of Directors of the 1394 Trade Association. Board of Directors acceptance of this specification does not necessarily imply that all board members voted for acceptance. At the time it accepted this specification, the 1394 Trade Association. Board of Directors had the following members:

Eric Anderson, Chair
Max Bassler, Vice-Chair
Dave Thompson, Secretary

The Cable & Connector Working Group, which developed and reviewed this specification, had the following members:

James Snider, Chair
Jim Koser, Temporary Secretary
### Revision history:

1. **Revision 0.5 (March 16, 2004)**  
   Initial Draft for Distribution

2. **Revision 0.6 (June 15, 2004)**  
   Additional Product Drawings and Editorial Changes

3. **Revision 0.65 (September 9, 2004)**  
   Prepare ballot version

4. **Revision 1.0 (March 7, 2005)**  
   Updated BRC version for BoD
Environmentally Sealed CAT-5, IEEE 1394b-2002 Interconnect System

1 Scope and purpose

1.1 Scope

This specification defines an environmentally sealed CAT-5e connector systems, which meets IEEE-1394b-2002 performance specifications, for use in demanding factory automation, medical, test equipment and industrial applications. The core IEEE 1394b-2002 CAT-5e connector is surrounded by an external housing, which seals it from dust, water, oils and other external substances that can compromise signal integrity. The additional sealing requirements will be defined in the specification.

1.2 Purpose

To offer a rugged solution that meets IEEE-1394b-2002 for use with CAT-5e UTP cabling. Doing so will enable 1394 to reach new customers in new markets and provide an interconnect solution tailored towards their unique needs. Factory networking may be one of the ways this interconnect can be used under the performance found in IEEE 1394b-2002 standard.
2 Normative references

2.1 Reference scope

The specifications and standards named in this section contain provisions, which, through reference in this text, constitute provisions of this 1394 Trade Association Specification. At the time of publication, the editions indicated were valid. All specifications and standards are subject to revision; parties to agreements based on this 1394 Trade Association Specification are encouraged to investigate the possibility of applying the most recent editions of the specifications and standards indicated below.

2.2 Approved references

The following approved specifications and standards may be obtained from the organizations that control them.

CEI/IEC 60529, Edition 2.1, Degrees of Protection Provided by Enclosures (IP Codes)
VG 95234, Electrical Connectors with Bayonet Coupling, Pressure-Water Tight

Throughout this document, the term "IEEE 1394" shall be understood to refer to IEEE Std 1394-1995 as amended by IEEE-1394a-2000 and IEEE Std 1394b-2002.

3 Connectors

This clause specifies all dimensions, tolerances and descriptions of features that affect the intermateability and interoperability of the environmentally sealed plugs and sockets. The features of the sealed plugs and sockets that do not affect the intermateability and interoperability are not specified and may vary at the option of the manufacturer.

4 Cable Construction (reference)

1. CABLE DESCRIPTION:
   CAT SE, 24 AWG, 4 PAIRS, SHIELDED, BLACK

2. CONSTRUCTION:
   CONDUCTORS: 24 AWG, STRANDED COPPER
   INSULATION: POLYOLEFIN

3. COLOR CODE:
   PAIR 1: BLUE, WHITE/BLUE
   PAIR 2: ORANGE, WHITE/ORANGE
   PAIR 3: GREEN, WHITE/GREEN
   PAIR 4: BROWN, WHITE/BROWN

4. SHIELD:
   ALUMINUM-MYLAR TAPE IFOIL SIDE IN
   AND 22 AWG DRAIN WIRE

5. JACKET:
   MATERIAL: PVC, .028 THK
   COLOR: BLACK
   CD: .254-01

6. STANDARDS:
   UL444/CSA-C22.2 NO.214, TYPE DW
   ISO/IEC-11801, PATCH CORD
